DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-13 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-13 of prior U.S. Patent No. 6,183,693. This is a double patenting rejection.

Although the instant claims alter the nomenclature of certain elements of the patented claims, the resultant scope of that which is claimed is unaffected. The patented claims recite "heating element sets" rather than the presently recited "heating elements", and further where the patented claims recite "a temperature controller" rather than the presently recited "electronic circuitry means". However, the specific structure and functional capabilities for the noted elements, as set out in the claims, are identical as between the patented claims and the instant claims. Thus, the instant and patented claims are of identical scope.
